Producers of Fine Organic Produce, Beef & Pork

Whole Hog—Custom Processing

The cost to purchase a **whole** hog is \$4.25 per pound hanging weight of the animal plus processing costs. The hanging weight (weight of the animal after slaughter but before it has been cut and portioned) of a whole hog is approximately 180-240# pounds. The finished weight of meat you receive is about 55-60% of the hanging weight of the animal, or **100-135#** pounds. The final yield will depend on how you choose to have the meat cut.

The processing fee will be approximately \$400-\$500. This quote is based on how we typically have our pork cut and does include making organic uncured, smoked bacon. You will incur additional fees if you choose to have processed products made, additional grinding, etc.

Your total purchase will come to ***approximately \$1,165-\$1,520 per animal*** (\$765-\$1,020 for the animal plus \$400-\$500 for processing). We ask for payment of \$625 at the time of purchase. We will invoice you for the remainder of your total after the animal has been processed and we know the actual hanging weight and processing charges. We will handle all communications with the processor and will work with you to prepare the cutting order for your animal.
